

Testimonies from 2014

- I had injured my knee during a fall and it progressively got worse until I couldn't put weight on it without pain and eventually had to use crutches. I came to the Healing Rooms and they prayed for me and laid hands on me. Then they asked me to try walking. I tried 3 times. It started with sharp pain but each time it got less and I was able to walk out the door without crutches. I went for an MRI two days later and the results came back that everything was normal. Praise God! ~ Alyssa
- I came into the Healing Rooms with a lot of pain in my legs. After prayer my legs felt much better. ~ Wanda
- I received prayer at the Healing Rooms for restored relationships. The Lord took away all my anxiety and weariness as I let Him take over the healing process. The prayer also opened my heart for meeting a new mate. ~ Debbie
- I contacted the Healing Rooms with a request to pray for my mother who was hospitalized. She came home from the hospital within the next week and is doing so much better after being very ill. The prayers of the righteous avail much. ~ Denise
- I had pain in my left hip joint and down my left thigh. The Healing Room Team prayed for me and for all pain to go. I felt very relaxed as I received, and when I left the room all pain was gone. The best test was when I did outdoor chores with heavy lifting the next week. There was some mild pain but not like before. I continue to claim the healing daily. Praise the Lord! ~ Bob
- I had been battling for a week what I thought was food poisoning and finally went to the ER with severe pain. They did a cat scan and found a kidney stone. They were so busy that they couldn't get to me for treatment that night. They gave me meds for treating the symptoms (which didn't work and I was still in extreme pain with vomiting and nausea). As a Healing Room team member I started singing praise songs about the Lords protection, and the pain level went way down. My husband continued to claim the Lords promise that I was healed and the stone would be gone. I was finally moved from ER into the operating area the next afternoon. They took another x-ray and the stone was still there. At 4:30 PM they did the procedure to remove the stone and IT WAS NOT THERE. The Doctor apologized to my husband and I am home. No follow-ups. This was an awesome miracle. ~ Judy
- The day after I had prayer at the Healing Rooms, I did all of my housework and laundry that needed to be done before our trip to Mississippi. That was significantly better than I had been doing. My blood pressure is back to normal and my pH level is in the right place. I still have some heaviness in my breathing but not bad. I praise God for His healing and trust Him for complete healing that His glory may be shown. --Carol
